```
3   status: true,
4   "result": [
5     {
6       "id": 1,
7       "userid": 1,
8       "folderid": 1,
9       "name": "My first Image",
10      "folderstatus": "private"
```

```
10     folderstatus : private ,
11     "image": "abcdef",
12     "seedid": "463782",
13     "createdat": "2023-04-12T05:35:20.857Z",
14     "updatedat": "2023-04-12T05:35:20.857Z"
15 }
```

why we add these other ids in database as these are of no use! we only need seed id info folder info user info and Image URL.

user details added

Negative prompt added

The screenshot shows a REST client interface with a POST request to `localhost:8082/images`. The request body is a JSON object with the following fields: `userID` (11), `FolderID` (1), `name` (girl with a flow), `negativePrompt` (red), and `image` (). The response body is a JSON object with the following fields: `message` (Images Added), `status` (true), and `result` (an array containing an object with `id` 1).

```
POST localhost:8082/images

How to add Folder(Public) In any gallery?

according to maam, Every user will have single public gallery and if a user create a folder it will be private by default.

https://staging-supermachine-be.mtechub.com/folder/update_folder_status

by calling this api the status will change to public and will shown in that gallery

Get all public galleries of All user → missing Apis.

Every user have single gallery and in profiles--> View all Public gallries

https://staging-supermachine-be.mtechub.com/gallery_profile/view_all_gallery_profiles

here is the api of getting all profiles
